TEAM**

CORPORATE STRUCTURE

BENOIT JOLIVET owns solid reputation in the bar turning and machining of precision components since 1929.

Our strength lies in our collaborative mindset. Our men and women share knowledge with each other, with customers and suppliers.

A qualified team of almost **60 people** working over **100 high-tech machines** installed in a spacious production unit (7 000 m²).

HOW ACTIVITIES

Supplier of the automotive field for many years, we have extended into sports equipment and capital goods on the strength of an extensive manufacturing range and renowned expertise.

- Others
- Parts for valve
- Parts for actuator
- Parts for carabiner
- Electricity
- Glow plug shell

OUR KNOW-HOW

Technical parts from Ø 4 mm up to Ø 65 mm

Out of almost all material

- Aluminium, brass and bronze
- Free cutting steel, carbon steel and alloyed steel
- Stainless steel
- Inconel alloy
- 100Cr6 and CrMo

All along the life of your products
from small to large batches

OPTIMIZED MEANS

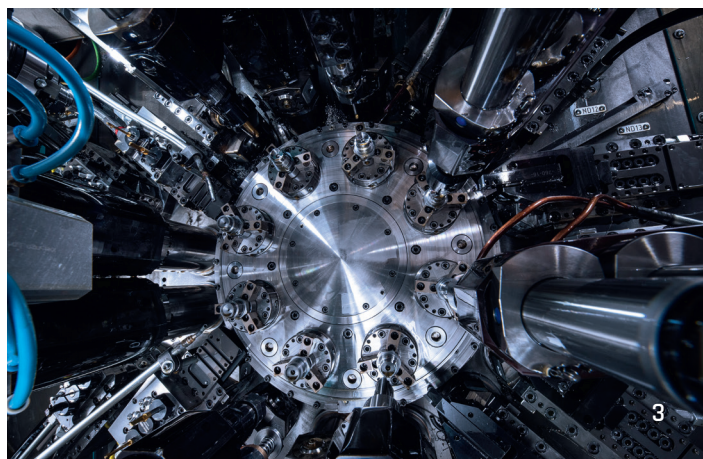

Bar turning and machining of precision components are our core businesses.

Additionally, we have a qualified subcontracting network for activities such as heat-treatment, surface treatment, grinding, honing, etc...

With such versatility, customers can rely on us for solutions by every step of their project.

OUR GOAL

Optimize production processes for the parts entrusted by our customers to achieve the best technical and economical solution throughout the product life cycle.

MACHINES

MACHINING AND BAR TURNING

- 30 Multispindle lathes
(6-8 spindle - 6-8 spindle CNC)
- 15 CNC Machines
- 9 Single-spindle lathes

COMPLEMENTARY MACHINING

- 17 Transfer machines
(4-6-8-12 stations - 8 stations CNC)
- 7 CNC lathes
- 2 CNC machining centres and 2 CNC
milling machines
- 2 Lapping machines
- 2 Hard turning machines

A NETWORK TOP-QUALITY SUPPLIERS

- Heat treatment and surface treatment
- Grinding
- Honing
- Gear hobbing

QUALITY MANAGEMENT

- 7 Camera-based automatic control machines
- 1 Three-Coordinate measuring machine
- A wide range of measuring instruments and equipment, especially for cleanliness testing
- Special analyses and inspections at the Technical Center (CETIM)

PRODUCTION SAMPLE

PSG / ICPS PARTS STAINLESS STEEL

- Dimension: \varnothing 13 - 14,60
L 60 mm - 100 mm
- Capacity: 10 000 / Year
to 1 800 000 / Year

GLOW PLUG SHELL STEEL

- Dimension: \varnothing 8 - 12
L 32 mm - 120 mm
- Capacity: 15 000 / Year
to 8 300 000 / Year

PARTS FOR VALVE STAINLESS STEEL STEEL - BRASS

- Dimension: \varnothing 4 - 22
- Capacity: 10 000 / Year
to 2 200 000 / Year

ACTUATOR MAGNETIC CORE - POLE CORE STEEL

- Dimension: \varnothing 30 - \square 30
L 29 mm - 57 mm
- Capacity: 10 000 / Year
to 2 000 000 / Year

PARTS FOR CARABINER ALUMINIUM

- Dimension: \varnothing 12 - 25
L 23 mm - 50 mm
- Capacity: 10 000 / Year
to 1 100 000 / Year

TRANSDUCER BODY STEEL - STAINLESS STEEL

- Dimension: \square 24
L 25 mm
- Capacity: 10 000 / Year
to 200 000 / Year
